OUR ASSOCIATION

MH SAFETY ENTERPRISES Providing Solutions for fire safety in Industrial, Commercial, Office and home environment.

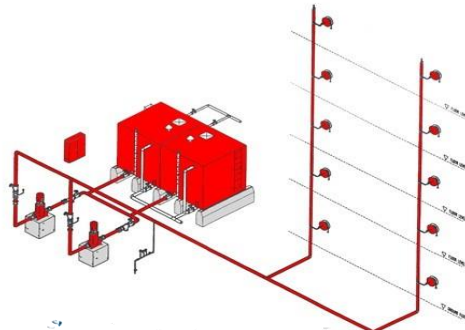

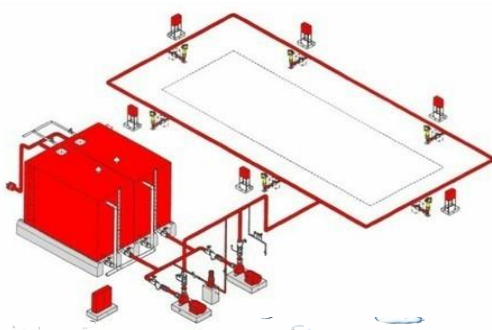

OUR STRENGTH

We have qualified adequate human resources headed by a team of professionally qualified & experienced engineers, who are capable of consultancy designing, Execution & Maintenance. We take the utmost care for quality every fire extinguisher put to the ultimate tests viz. Hydraulic Pressure test, Caking test, anti-corrosive test, quality checking tests for high quality products.

FIRE HYDRANT SYSTEM

Our Team Design and Installation of Fire Fighting Hydrant Systems are the most commonly used systems, in many residential and industrial projects. that fire man is using the Fire Hydrant System. Such is the power of the Fire Hydrant System that water can be shot right up to 7 floors, directly into the fire.

FIRE SPRINKLER SYSTEM

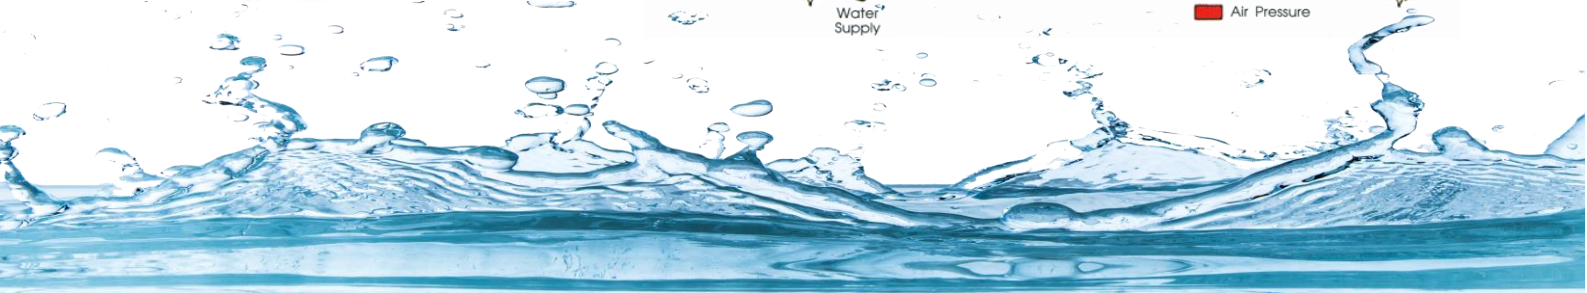

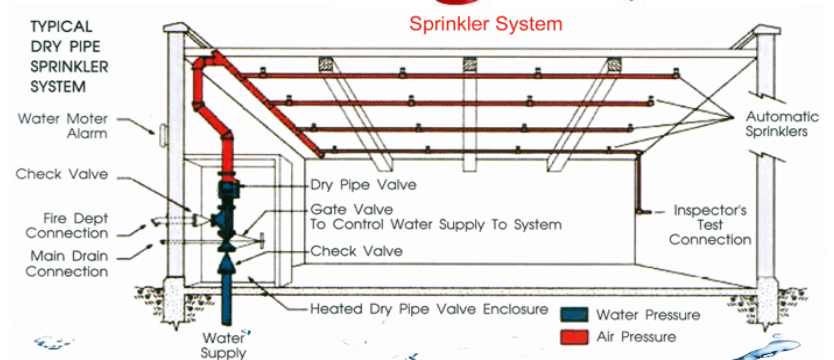

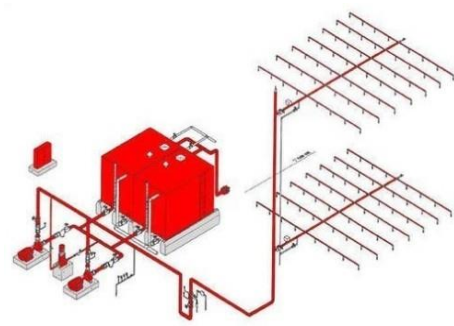

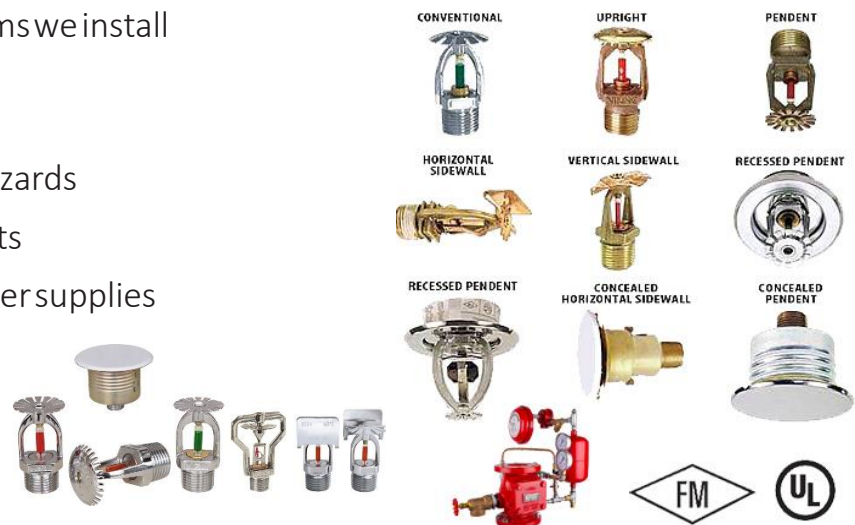

Our teams of engineers and technicians provide expertise and assistance in designing and installing fire sprinkler systems conforming to BS EN 12845 and NFPA regulations for industrial, commercial and residential premises.

We use specialist fire sprinkler hydraulic calculation software that enables us to carry out hydraulic calculations of fire sprinkler systems, water mist, medium and high velocity water spray systems, hydrants and foam/water monitors systems. Our FHC hydraulic calculation software complies with 16 different national and international design standards including EN 12845, BS 9251, FM, NFPA, CP 52, ASIB, and AS2118.1 for fire sprinkler systems. It enables us to make correct configuration of the systems we install

Our Sprinkler Services include:

- Evaluation and classification of hazards
- Supply of systems and components
- Evaluation of the adequacy of water supplies
- Installation requirements
- Testing/Commissioning
- System maintenance
